

WHO ARE WE?

LanceBotics Team 200 is an extracurricular robotics team comprising of 45 Leaside High School students, a teacher volunteer and numerous parent helpers. We compete in various VEX Robotics competitions across Ontario and hope to represent Canada internationally for the second consecutive year at the **VEX Robotics World Championships in Louisville, Kentucky**. LanceBotics Team 200 is divided into three different teams competing against other schools throughout various competitions. The teams are: Team 200A, the main team started back in 2013, Team 200B, the rookie team established mid-2015 and Team 200C, the class team composed of students from Leaside High School's computer technology class. With the support of contributors and the Leaside community, LanceBotics will have many successful years to come.

OUR VISION

To become a well-known and respected organization within the Leaside community, promoting the hobby of robotics. We aim to use robotics to apply our knowledge of **Science, Technology, Engineering and Mathematics (STEM)** while maintaining a fun and competitive environment. Although our goal is to qualify for Worlds, we ultimately aspire to win the entire competition. We will bring Leaside continued success this year, as we aim for the global stage yet again!

WHAT IS VEX?

The VEX Robotics Design System offers students an exciting, hands-on platform for learning about career opportunities rich in **STEM**. These are just a few of the many fields students can explore by creating with VEX Robotics technology. Beyond science and engineering principles, a VEX Robotics project encourages teamwork, leadership and problem solving skills.
