

LANCE BOTICS

LHS 200

Who Are We?

LanceBotics Team 200 is an extracurricular **VEX** robotics team comprised of Leaside High School students and teacher mentors. LanceBotics includes four sub-divisions; 200C, 200G, 200H and 200X, who compete against other teams in competitions of skill and engineering organized by **VEX Robotics**. Applying our knowledge of Science, Technology, Engineering and Mathematics (**STEM**) to robotics, we maintain a fun, educational and competitive environment, locally and abroad. In preparation for VEX Worlds, LanceBotics relies on its sponsors, a key component for the team's outstanding success. Not only would your support help our team, but could also help promote your franchise at an international level. With the support of contributors and the Leaside community, LanceBotics looks forward to many successful years to come.

What is VEX?

The VEX Robotics Design System offers students an exciting, hands-on platform to learn about career opportunities in the **STEM** fields by providing building resources, simulating work environments and encouraging professional practices. Beyond science and engineering principles, a VEX Robotics project encourages teamwork, leadership and problem solving skills. Organizing local and international competitions, VEX Robotics teams hail from more than 50 different countries worldwide and involve more than a million students!

Past Successes

Lancebotics is proud to have previously **represented Canada internationally** for three consecutive years at the annual Vex Robotics World Championship in Louisville, Kentucky. We credit our successes to our generous sponsors and hard working team members. Our perseverance and dedication to overcoming the challenges presented by VEX Robotics make us the team to support. With your help, we hope to return to the VEX World Championships during the **2018 - 2019 year**.

Cost Breakdown

Event registration costs	\$ 4 300.00 CAD
Robot parts, hardware	\$ 7 000.00 CAD
Field and game pieces	\$ 3 700.00 CAD

Become a Contributor
